Shipments requiring special devices for safe handling will be accepted only when such special devices are provided and operated by and at the risk of the shipper or its agent or the consignee.

a. Subject to advance arrangement, Carrier will accept shipments containing piece(s) which cannot be loaded in the belly compartment of narrow-body aircraft, or cannot be loaded on single 88-inches by 125-inches pallet because:
   1. Such piece(s) exceeds 125 inches in length, or
   2. Such piece(s) exceeds 88 inches in length and must, at the shipper or its agent's request or because of Carrier restrictions or governmental regulations, be loaded so that the length of the piece(s) exceed the parallel 88-inch length of the supporting pallet, or
   3. Such piece(s) prevent other freight from being loaded on the same pallet because of special tie-down equipment required by the U.S. Government (Federal Aviation Administration).

b. Such shipments will be transported only on pallets provided by Carrier measuring 88 inches in width by 125 inches in length.

c. The dimensions of the shipment (greatest length, width and height of all pieces in the shipment) must include the length of any tie-down equipment.

The Carrier reserves the right to refuse to transport, in any one aircraft, consignments having declared values which in aggregate violate or lead to the violation of this rule.

2.4. ADVANCE ARRANGEMENTS

Advance arrangement means that the shipper is required to contact United prior to tender of a shipment in order to enable the shipper and the Carrier to establish the time and place of tender, and to enable the shipper and/or the Carrier to make special arrangements for the shipment. If the shipment is to be transported over the lines of more than one Carrier, the origin Carrier will accept the shipment from the shipper ONLY after the origin Carrier has completed all necessary arrangements required by subsequent carriers.

The following shipments will be accepted for carriage only upon advance arrangements:

2.8. UNDELIVERED CONSIGNMENTS

2.8.1. FAILURE OF CONSIGNEE TO TAKE DELIVERY
In the event of the sale of the shipment as provided for above, either at the place of destination or at the place to which the shipment has been returned, Carrier is authorised to pay to itself and other transportation services out of the proceeds of such sale all charges, advances, and expenses of Carrier and other transportation services plus costs of sale, holding any surplus subject to the order of the shipper. A sale of any shipment shall, however, not discharge the shipper and/or owner of any liability hereunder to pay any deficiencies.

3. TRANSPORTATION CHARGES

3.1. GENERAL
1. Services Availability
Rates and charges are not applicable for such periods as service/equipment is not available between the points named.
2. Routing and Rerouting
The charges named in the applicable rates tariff will apply only over the routes and via interchange points authorised herein except that when, in the case of pronounced traffic congestion (not an embargo) or through Carrier(s) error, Carrier forwards shipment by other transfer points of the same carriers or over carriers party to this tariff, the rates and charges specified in the applicable rates tariff (but no higher than the rate or charge applicable over the actual route or movement) will be applied.

3.7. CLASS RATES
3.7.1. GENERAL
2. Combination of rates
Restriction to through published rates
When United performs only a portion of international joint transportation:
Published through rates and charges will not apply on the following commodities, when the routing is jointly via United Airlines and any other carrier(s):
- Live Animals, warm and cold blooded
- Human Remains, uncremated
In lieu of the published rate, a combination of LOCAL sector rates must be used.
United will require revenue based on its full applicable domestic and/or international sector rate or charge for the above-mentioned commodities.

3.7.8. BAGGAGE SHIPPED AS CARGO
General
In addition, United defines all portable personal electronic devices, such as computers, games and audio/visual equipment, as being personal effects.

3.8. CONSTRUCTION/COMBINATION OF UNPUBLISHED RATES
3.8.1. CONSTRUCTION/COMBINATION OF UNPUBLISHED RATES AND CHARGES
When a through rate applicable to Carrier’s service is not published in section 4.3 of the TACT Rates Tariff, such through rate may be constructed by using the provisions of General Rule 3.8. in the TACT Rules Manual.

3.9. COMPUTATION OF CHARGES
3.9.2. MIXED CONSIGNMENTS
When goods or commodities that qualify for different rates and conditions are consolidated in one package or ULD, the weight of the package or ULD will be charged on the basis of the highest rated item in the package or ULD.

3. Calculation of weight charges
1. When the Shipper has declared the total gross weight of the consignment, the charge is obtained by multiplying the applicable rate by the chargeable weight.
2. When the Shipper has declared the weight, volume and contents separately for each package or group of packages in a single consignment, the charge for each kind of goods (as defined by the unique rate type) is obtained by multiplying the applicable rate by the chargeable weight. In this instance, the chargeable weight will be calculated by using the sum of the actual weights or the sum of the volume weights, whichever is higher, for each package or group of packages that have the same rate type.
3. When the Shipper has declared mixed consignments, the charges will be summed for all of the rate types in order to determine the total rate for the entire consignment.

5. Minimum Charges
A minimum charge will be assessed for each unique rate type that is tendered on the same Air Waybill.

3.10. UNITIZED CONSIGNMENTS
3.10.3. GENERAL RULES FOR THE USE OF UNIT LOAD DEVICES
1. Recontouring or unloading of ULD's
A. Recontouring/reloading charges
When the shipper tenders to the Carrier an improperly loaded pallet and/or ULD, which cannot be accommodated on the aircraft, United Airlines will recontour or repack the pallet and/or ULD at the following charges per pallet and/or ULD:

<table>
<thead>
<tr>
<th>ULD Types</th>

</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>8D, 8 (LD2, LD3)</td>

</tr>
</tbody>
</table>

B. Loading and Unloading charges
Upon request from the shipper or consignee to provide loading or unloading service, or when such service is required by Customs, agriculture or security authorities, the following charges will be assessed per pallet and/or ULD:

<table>

</tr>
</tbody>
</table>

a. Loading and unloading service will only be performed at the rates and charges provided in this tariff.
b. Loading and unloading service will not be performed for Valuable Cargo or for shipments traveling under a Customs Bond.
c. United Airlines will not be responsible for loss or damage to the contents of the shipper-owned pallets and/or ULDs.

8.3. INFORMATION BY CARRIER

3. Permanently attached articles
In the event an empty container is returned to United containing any unauthorised permanently attached articles, United will assess a service charge of USD 250.00 or equivalent currency amount for the removal of such articles, including Garments-on-Hanger racks.

4. Unavailability of Carrier Owned ULDs
   a. When a shipper requests one or more carrier owned ULDs of a particular type, and the specific ULD rating is provided for the planned routing, and such ULDs are not available, United Airlines will, subject to the consent of the shipper, supply a sufficient number of smaller ULDs or sufficient bulk space to accommodate the shipment.
   b. The rate and charges applicable to the requested ULDs will apply provided the shipper does not exceed the maximum net weight and maximum internal cubic capacity in the smaller ULDs applicable to the originally requested ULDs.
   c. United Airlines may inspect the smaller ULDs at destination to determine if the shipper exceeded the maximum net weight and/or the internal cubic capacity applicable to the larger ULDs originally requested. If the shipper exceeded the maximum net weight and/or the internal cubic capacity applicable to the larger ULD, the rates and charges applicable to the smaller ULD will apply.

3.10.4. USE OF AIRLINE OWNED AIRCRAFT ULDs
1. Subject to advance arrangements and the availability of ULDs, United Airlines will furnish ULDs.
2. The tender and return of United Airlines ULDs will be as follows:
   a. Shipper’s Time Limitations for Returning Loaded ULDs
      An empty ULD furnished to the shipper for loading must be tendered loaded to United Airlines at the airport where such ULD was furnished within 48 hours (excluding Saturdays, Sundays and legal holidays) beginning at midnight after receipt by the shipper.
   b. Consignee Time Limitations for Returning Unloaded ULDs

   c. Demurrage Charges for Late Tender of ULDs
      In the event the ULD is not tendered to United Airlines as specified in paragraph (a) and (b) above, a demurrage charge of USD 25.00 (or local equivalent currency) will be assessed for each 24-hour period, or fraction thereof, in excess of 48 hours, computed from midnight on the date of receipt until such ULD is returned. The first Saturday, Sunday, and all legal holidays are excluded.

3.10.5. BULK UNITIZATION CHARGES
1. Basis of Charges
   a. When a consignment consists of two or more pallets/ULDs and are being transported on the same Air Waybill, carrier will rate each ULD separately.
   b. Rating pallets/ULDs for bulk shipments will only be allowed if the requested pallet/ULD is unavailable. This will apply if it is determined that the quantity (space/weight) of the bulk shipment does not exceed the amount the requested pallet/ULD could hold.

2. Construction of unspecified Bulk Unitization Charges
   Construction of charges to, from and between TC1 TC2 TC3
   The Bulk Unitization Charges can be constructed as follows:
   a. The pivot rate (A charge) can be calculated by discounting the origin/destination highest applicable bulk rate by 10%
   b. The over pivot rate (C charge) can be calculated by discounting the origin/destination highest applicable bulk rate by 20%.
   c. To obtain the charge for a consignment, the minimum charge (B charge) for the ULD used must be calculated by multiplying the pivot rate per kilo by the minimum chargeable weight as shown in the Minimum Chargeable Weight Table, section 4.2 in the TACT Rates Tariff, for the type of ULD used.
   d. If the actual weight is in excess of the minimum chargeable weight, the excess weight charge must be calculated by multiplying the weight in excess of the minimum chargeable weight by the over pivot rate (C charge).
